

Using Quick Search

The Quick Search function can be used to find specific Item #'s. You can find the Quick Search bar at the top of the [homepage](#). Once you type in the **full item number** you are looking for, the item will show up in the search results below the search bar along with related items. You'll then be able to click on the item you searched for to learn more or order.

**Quick Search will not display search results appropriately if you do not use the entire Item #.

If you do not know the exact item number for what you are looking for – visit the [shop tab](#). Using the **Shop By** section on this tab, you can then narrow your search to the item or items you are looking for. By selecting the categories that apply to the item you're searching for, your results will be narrowed down for you to choose the correct item.
